

# Application for installation of Car Parking Barrier / Bollards

## Installation Guidelines:

The following are a set of guidelines and procedures that are designed to help alleviate any potential issues or disputes between owners. The executive committee requires that owners make an application and confirm that the stated guidelines will be met.

The Bollard must comply with the following criteria:

1. The bollard must be attached to your car park slab
2. It must remain wholly within the car space lot and set back from the front of the car park by 1.8m
3. It must not cover or prevent access to services such as access hatches
4. It must not be installed in such a way as to block or affect any of the building utility or services
5. It must not be installed in such a way to impact other car parks
6. Colours of the bollard are to be black or yellow
7. Bollard must be installed within the centre of the car park space
